# SKILL UP

ROUNDTABLE

Cataloging & sharing research
in usable ways

**CONTEXT**

**Research completed**

**Multiple teams in your org
(not privy to all research)**

WHAT HAVE YOU TRIED?

Wiki

Request-based custom cuts

Excel repository

Regular cadence of read outs

OTHER RESOURCES MENTIONED:

Notion.so

UserTesting.com
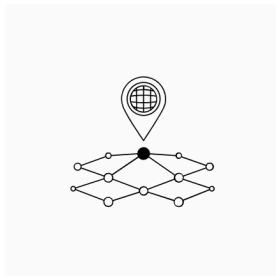

Getenjoyhq.com

TOPICS TO DIVE INTO

Complexity

*Tagging / Process
Categorization
(crowdsourced?)*

Specificity

*Research Qs
Synthesis focus*

Immediacy

*What makes something
"usable"?*

QUESTIONS WE PONDERED

Ethics in research
When is it right to reuse?
What should be included in reuse? What should be extrapolate-able?

Deleting
When does data go stale?

Limited emergence
Shared organization
Trace-ability
Putting guardrails on interpretation of data

Updating
When do you update constant elements like personas? How do you disseminate updates across design teams?

Push vs Pull
- *When you recognize past work is helpful vs requests coming in from teams*
- *Helps go go through:*
  - *What are ppl asking*
  - *What do we have*
  - *What did we find?*
  - *Date of research*
  - *(is there a quick n dirty way to do validation?)*
